

Lady Margaret Primary School

Where children come FIRST

SUPPORTING PUPILS AT SCHOOL WITH MEDICAL CONDITIONS' POLICY

Approved by: Helen Rai and Dean Horridge **Date:** 8th February 2022

Last reviewed on: February 2022

**Next review due
by:** February 2023

This school is an inclusive community that welcomes and supports pupils with medical conditions so that they can play a full and active role in all aspects of school life, remain as healthy as possible and achieve their academic potential.

The Department for Education statutory guidance 'Supporting pupils with medical conditions at school' (2014) states:

"Children and young people with medical conditions are entitled to a full education and have the same rights of admission to school as other children. This means that no child with a medical condition can be denied admission or prevented from taking up a place in school because arrangements for their medical condition have not been made. However, in line with their safeguarding duties, governing bodies should ensure that pupils' health is not put at unnecessary risk from, for example, infectious diseases."

This policy takes into account the school's legal duties under the Children and Families Act 2014 to make arrangements to support pupils with medical conditions, as well as its duties under the Equality Act 2010. This policy details the school's arrangements to support pupils with long term medical conditions. In this document 'medical condition' refers to any physical or mental health condition that requires ongoing health professional input.

This policy will be reviewed in June 2020 or earlier if there is any change in the regulations. The effectiveness of these procedures will be monitored by the governing board.

*This policy supports the **Rights Respecting principles** adopted by Lady Margaret Primary School and is particular relevant to the following articles:*

Article 23 (Children with disabilities): *Children who have any kind of disability have the right to special care and support, as well as all the rights in the Convention, so that they can live full and independent lives.*

Article 24 (Health and health services): *Children have the right to good quality health care – the best health care possible – to safe drinking water, nutritious food, a clean and safe environment, and information to help them stay healthy. Rich countries should help poorer countries achieve this.*

Policy Objectives

- *To encourage and support inclusive practice*
- *To ensure regular attendance by all children*
- *To ensure that health and safety measures are in place regarding the administration of medicines during school hours*
- *To ensure that the health and safety of children attending Lady Margaret Primary School is not compromised.*

Positive Handling Policy which includes advice on Toilet management plans and Positive Handling plans.

Health and Safety Policy

First Aid policy which includes a register of all trained first aiders, what training they have received and when this is valid until.

Complaints policy

Glossary

Controlled Drug (CD): Medication that is controlled as part of the misuse of drugs legislation (e.g. methylphenidate/Ritalin or some strong pain killers)

Education, Health and Care (EHC) plans: A legal document that describes a child's special educational, health and social care needs, and support required to meet those needs

General Data Protection Regulation (GDPR): A data protection regulation from May 2018 intended to strengthen and unify data protection for individuals.

Individual Healthcare plans: A document that describes a child's medical needs and support required in school to meet those needs.

Individual risk assessment: A risk assessment to determine the risks and controls required for pupils with severe/complex or potentially life-threatening health conditions.

Medical condition: For the purposes of this policy, 'medical condition' refers to any physical or mental health conditions that required ongoing health professional input (e.g. from GP, clinic or hospital specialist).

Medical Conditions Co-ordinators/leaders: Designated members of staff who lead the implementation of the 'Supporting Pupils at School with Medical Conditions' policy and support pupils with medical conditions.

Special educational needs or disabilities (SEND): Special educational needs and disabilities that can affect a child or young person's ability to learn.

Special Educational Needs Co-ordinator (SENCO): Designated members of staff who lead the implementation of the SEND policy and support pupils with SEND.

Identification, Registers and Individual Healthcare plans

1. The school identifies all children with medical conditions

- 1.1. The school asks parents/carers if their child has any physical or mental health condition on the medical questionnaire as part of the enrolment process ([Appendix 2](#)), and annually thereafter. The school asks for explicit consent to share this information with relevant school staff and healthcare professionals.
- 1.2. The school follows the procedure detailed in [Appendix 3](#) to ensure that every child with a medical condition has an individual healthcare plan in place before they start school (see section 3). Any exception to the requirement to have an individual healthcare plan in place before the child starts school will be at the discretion of the school.
- 1.3. Parents/carers are responsible for informing the school of any new diagnosis, or changes to their child's medical condition, as soon as possible. It is the school's responsibility to act on this information.

2. The school keeps a record of all children with medical conditions

- 2.1. The school keeps a register of pupils with medical conditions to identify and safeguard these students. This register is held on Medical Tracker, a secure web based system, with access by staff as appropriate, and includes the child's individual healthcare plan.
- 2.2. The school ensures that the pupil's confidentiality is protected in line with the General Data Protection Regulation (GDPR), and will only share this information with relevant members of staff and healthcare professionals as appropriate.

3. All children with a medical condition have an individual healthcare plan

- 3.1. The school recognises that needs are specific to an individual pupil. As such, all pupils with a medical condition require an individual healthcare plan.
- 3.2. All pupils with a medical condition will require a meeting to discuss the individual healthcare plan. This may be as part of the induction or admissions process. For more severe/complex conditions, an additional meeting between relevant school staff (including those who will be providing support to the pupil) and the parent/carer will normally be required to complete the individual healthcare plan, and may also involve health professionals and the pupil if appropriate. This should ideally take place before the start of the academic year or school term if mid-year entry ([Appendix 3](#)).
- 3.3. The healthcare plan is written onto Medical Tracker and may vary according to the nature and severity of the medical condition. All individual healthcare plans should detail the medication and care requirements at school, what to do in an emergency and details of the child's GP.
- 3.4. For more severe and/or complex medical conditions, the individual healthcare plan should also include an individual risk assessment (Appendix 5) and an assessment of how the condition may impact on the child's learning, behaviour, performance and wellbeing, and plans to mitigate these risks and minimise disruption.
- 3.5. If a pupil has special educational needs or disabilities (SEND), these needs should be made clear in the individual healthcare plan and linked to their SEN or Education, Health and Care (EHC) plan if they have one. For children with complicated long term medical conditions who are on the SEN register, the SEN review meeting each term should also be used to review and update healthcare plans if needed.
- 3.6. The school recognises that needs change over time. As such, individual healthcare plans should be updated annually, or whenever the pupil's needs change. It is good practice to meet with parents annually to review the individual healthcare plans and the school considers ways of doing this, such as during parents' evenings. Parents are asked to update the school if medication changes or a new healthcare plan is needed.
- 3.7. A copy of the individual healthcare plan is maintained and updated by the school and is easily accessible to staff who need to refer to it, while also preserving confidentiality in line with the **General Data Protection Regulation**.
 - A photo sheet showing the children across the school who have severe allergies should be given to all staff at the same time. The same sheet should be given to all kitchen staff and displayed above the serving area in the kitchen
 - The SMSAs have access to Medical Tracker

- Electronic copies of all healthcare plans are kept on Medical Tracker <https://www.medicaltracker.co.uk/> . This is an online database and therefore access is available via all internet enabled devices in the school and for those staff with username and password access.
- A list of pupils with health care plans, alongside specific conditions, are stored in medical boxes in individual classrooms for quick reference.

Medication

4. The school has clear guidance on administering medication at school (including creams and lotions)

- 4.1. Medication should only be administered at school when it would be detrimental to a child's health or school attendance not to do so. Where clinically possible, parents/carers should request their prescribing clinician to prescribe medication in dose frequencies which enable them to be taken outside the school day.
- 4.2. If medication is required at school, this will only be given as detailed in the pupil's individual health care plan, and when parents/carers fill out a medication consent form. *If there is a short-term need parents/carers should contact the school to discuss and the medication consent form must be completed by parents/carers **and agreed by a member of the senior leadership team.*** ([Appendix 6](#)).
- 4.3. The school keeps an accurate record of all the medication administered, including the dose, time, date and supervising staff on Medical Tracker. Records offer protection to staff and children and provide evidence that agreed procedures have been followed.
- 4.4. Non-prescribed creams and lotions will not be applied at school.
- 4.5. Sun cream needs to be supplied by parents and carers. Parents and carers need to apply sun block in the morning before coming to school.
- 4.6. Alternative medication, including homeopathic medication and herbal remedies, will not be administered unless prescribed by a GP/consultant.
- 4.7. Simple Analgesics (Pain Relief) and Allergy medication (Piraton or similar) will only be given if there is an on-going long term medical condition i.e. febrile convulsions and it has been prescribed by a GP/consultant.
- 4.8. Non prescribed allergy medication will not be given in school.
- 4.9. If a child refuses medication staff will not force them to take it.
- 4.10. The refusal will be recorded and parents contacted by telephone.
- 4.11. In the event of a child refusing emergency medication parents and carers will, of course, be contacted immediately by telephone. The emergency services will be contacted immediately and a member of school staff will accompany the child to hospital if the parents have not arrived in time.**

5. The school supports staff who administer medication

- 5.1. The school ensures that there are members of staff trained to administer routine and emergency medication and undertake procedures to meet the care needs of an individual child (see section 11).
- 5.2. All staff are aware of the specific members of staff trained to administer medication or medical procedures in an emergency situation.

- 5.3. Staff who may be regularly expected to administer medication and undertake medical procedures should have this responsibility recognised in their job description. Staff are encouraged to volunteer for this role as part of their duty of care.
- 5.4. The governing board will ensure that the appropriate level of insurance is in place and appropriately reflects the level of risk. (See Appendix 15.)

6. The school has clear guidance on storing medication and equipment at school

- 6.1. The school ensures that all medication is stored safely, and that pupils with medical conditions and staff know where they are at all times, and who holds the key to the storage facility.
- 6.2. *The school allows pupils to carry their own medication/equipment if this is appropriate for their age and individual healthcare plan and has been risk assessed. Parents/carers should check that this medication is in date.*
- 6.3. Children prescribed with an Epi-pen or emergency asthma medication will need to have TWO pens/ pumps in school - they are kept with them in the classroom-medical backpack
- 6.4. Epi-pens should be kept in a clearly labelled-backpack in the classroom; this must travel with the children at all times including PE lessons and off-site visits. Parents are responsible for ensuring that Epi-pens they supply to school are 'in date'.
- 6.5. The school ensures that medication is in date and labelled in its original container where possible (although insulin will generally be supplied in an insulin injector or pump), and in accordance with its instructions including storage temperature. Letters will be sent home in advance as medication is nearing it's date for replacement.
- 6.6. Out of date medication will be sent home, pupils will not be able to attend school unless emergency medication, including Epi-pens, insulin and asthma pumps are up to date and available in the appropriate rooms in school.
- 6.7. The school keeps controlled drugs (e.g. methylphenidate [Ritalin], some strong painkillers marked CD on container) stored securely, but accessibly, with only named staff having access.
- 6.8. Parents/carers must collect all out of date medication/equipment, and to provide new and in-date medication when needed.
- 6.9. The school should not dispose of any medication. It is the parent/carer's responsibility to dispose of out-of-date medication.

7. The school has clear guidance on emergency inhalers and adrenaline pens

- 7.1. The school allows pupils to keep their own inhalers and adrenaline pens if appropriate (6.2) or stored securely but accessibly if not.
- 7.2. *The school's emergency asthma inhalers and adrenaline pens are available for pupils whom written parental consent and medical authorisation for use has been given. They are stored in a secure location but not locked away (see Appendix 8 for more details).*

8. The school promotes staff training in supporting pupils with medical conditions

8.1. The school recognises that different levels of training are required for different members of staff in order to meet the school's duties to support pupils with medical conditions.

9. Level 1 – All staff are aware of the medical conditions policy, emergency procedures and are encouraged to undergo further training

9.1. The school ensures that all staff, including temporary staff, are aware of this 'Supporting Pupils with Medical Conditions' policy and their role in implementing the policy as part of induction. *All staff will be required to sign up to this policy. This will be recorded in the staff file.*

9.2. All staff know which named members of staff should be called on in the event of a medical emergency and are familiar with the procedure for calling the emergency services. All staff are aware that if a pupil is taken to hospital by ambulance, a member of staff must accompany them and remain with them until a parent or carer arrives. Pupils should not be taken to hospital in staff cars.

9.3. The school has posters on display in the staff room and school office that reiterates the steps to take during an emergency.

9.4. The school encourages all staff to undertake awareness raising opportunities as part of its comprehensive programme of Continuing Professional Development (CPD), including First Aid training, as well as accredited online training modules tailored for schools around managing asthma and anaphylaxis (Appendix 10). The school keeps a record of staff training.

10. Level 2 – The school has a sufficient number of trained first aiders

10.1. The school ensures they carry out risk assessments as appropriate and have sufficient numbers of trained first aiders, taking into account factors such as the size of the school (Appendix 11).

10.2. The first aiders (*including paediatric first aiders as appropriate*) are trained in the management of common medical emergencies and Basic Life Support, including Cardiopulmonary Resuscitation (CPR). This should be refreshed at least every three years.

10.3. The school has an Automatic External Defibrillator (AED) on site which all staff are aware of (Appendix 11). Named members of staff are responsible for maintaining this. Instructions for use are on the defibrillator.

11. Level 3 – the school supports staff who take on specific responsibilities for supporting pupils with medical conditions

11.1. The school has named members of staff who are 'Medical Conditions Co-ordinators/Leaders', a role that should be recognised in their job description. These staff are trained on managing medical emergencies and supporting the implementation of this

'Supporting Pupils with Medical Conditions' policy. These staff are clear about the support they can receive and included as part of their annual appraisals.

- 11.2. Some children with medical conditions require more specific training for named members of staff. The school ensures that this training is provided by appropriate professionals (see Appendix 14 levels of training guidance).
- 11.3. The school ensures that there are sufficient numbers of staff trained to support pupils with specific medical conditions, taking into account staff absences, staff turnover and other contingencies.
- 11.4. Training should be sufficient to ensure that these members of staff are competent and have confidence in their ability to support pupils with medical conditions and to fulfil the requirements as set out in individual healthcare plans.
- 11.5. The family of a child should be key in providing relevant information to school about how their child's needs can be met, and parents/ carers should be asked for their views. They should provide specific advice, but should not be the sole trainer.

Whole School Environment

12. The whole school environment is inclusive

- 12.1. The school is committed to providing an accessible physical environment for pupils with medical conditions. This includes out-of-school activities.
- 12.2. All staff are aware of the potential social problems that pupils with medical conditions may experience and use this knowledge, alongside the school's bullying policy, to help prevent and deal with any issues.
- 12.3. The school uses opportunities such as personal, social, health and economic education (PSHE) and science lessons to raise awareness of medical conditions to help promote a positive environment.
- 12.4. The school recognises that any measures to identify pupils with medical conditions for their safety should be proportionate and take into account confidentiality and emotional wellbeing.

13. The school ensures that arrangements are made for pupils with medical conditions to participate in all aspects of the curriculum where reasonably possible

- 13.1. The school ensures that the needs of pupils with medical conditions are adequately considered so that they can participate fully in all structured and unstructured activities, extended school activities and residential visits.
- 13.2. The school understands the importance of all pupils taking part in physical activity (including out-of-school clubs and team sports). All relevant staff should make reasonable adjustments to physical activity sessions in accordance with a pupil's individual healthcare plan. This may involve ensuring that pupils have the appropriate medication/equipment/food with them during physical activity.
- 13.3. The school makes sure that a risk assessment is carried out before an educational visit. The needs of pupils with medical conditions are considered during this process and plans are put in place for any additional medication, equipment or support that may be required. This will require consultation with parent/carers and pupils and may require advice from the relevant healthcare professional to ensure that pupils can participate safely. *The school uses Ealing Council's educational and recreational visits handbook with relevant health and safety templates to complete.* www.egfl.org.uk/educationalvisits

14. The school understands the impact a medical condition may have on attendance and learning

- 14.1. School staff understand that frequent absences, or symptoms, such as limited concentration and frequent tiredness, may be due to a pupil's medical condition.
- 14.2. Where a pupil has frequent absences or a prolonged absence due to a medical condition, it is expected that parents/ carers will work with the school and healthcare providers to ensure relevant information is available as part of a coordinated care/support approach.

- 14.3. The school will refer pupils with medical conditions who are finding it difficult to keep up educationally to a relevant member of staff (e.g. the Special Educational Needs Co-ordinator) who will liaise with the pupil (where appropriate) parent and the pupils' healthcare professional.
- 14.4. Where a child is returning to school following a period of hospital education or alternative provision (including home tuition), this school will work with the local authority and educational provider to ensure that the child receives the support they need to reintegrate effectively. This may include updating their individual healthcare plan where necessary or providing time in Kaleidoscope during break and lunchtimes if required.

15.The school learns from incidents and complaints

- 15.1. The school investigates all serious incidents related to this policy and reports these to the Schools Health and Safety Advisor (Ealing Council Corporate Health and Safety) through the online portal www.egfl.org.uk/report-incidents. Learning from these incidents is shared with staff and used to inform any subsequent revisions to this policy.
- 15.2. The school responds to all concerns and complaints related to implementation of this policy, in line with the school's complaints policy

Appendix 1: 'Supporting Pupils at School with Medical Conditions' checklist

Area	In place	Needs some work	Not in place	Named person responsible for
Policy and implementation:				
Agreed policy in place	Updated May 21			
Policy revised annually in consultation with governors and staff	Updated May 21			
Policy on the school website		Update once agreed		
Governing board committee with a responsibility for and link governor(s) who visits the school termly to monitor implementation			unsure	
Annual report from the headteacher to the governing board on this policy	Yes			
Annual report to parents/communication via newsletters			unsure	
Identification, registers and individual healthcare plans:				
Process in place for notifying the school of pupils with medical conditions (e.g. questionnaire)	yes			
Process in place for ensuring all pupils with medical conditions have an individual healthcare plan in place before they start school	yes			
Process in place for reviewing the individual healthcare plans every year	yes			
A register of pupils with medical conditions in a secure location, with individual healthcare	yes			

plans, medication consent forms, medication records, and individual risk assessment forms				
Medication:				
Stores medication securely but accessibly	yes			
Process for ensuring all medication and equipment (including defibrillators) are in date	yes			
Accurate record of medication administered		To be audited Feb 22 – discussion needed around asthma inhaler use		
Protocol for use of emergency inhalers and adrenaline autoinjectors (<i>if applicable</i>)	yes			
Staff/training:				
Policy is part of all staff induction, including temporary, supply staff and volunteers	yes			
Staff/training:				
All staff are aware of the emergency procedures (Inc. information displays)	Yes			
Information on this policy in the staff handbook		To be reviewed		
All staff know the pupils they work with who have an individual healthcare plan/medical conditions	Yes			
School has risk assessed and has a sufficient number of trained first aiders	Yes			

Insurance cover current and adequate to needs	Yes			
Medical conditions co-ordinators/leads are clearly known by all staff, pupils, parents and other stakeholders	Yes			
Medical conditions co-ordinators/leads are clear about line management arrangements, annual appraisals and attend regular training	yes			
Job descriptions exist for medical conditions co-ordinators/leads and includes relevant responsibilities	yes			
Whole school environment:				
School admission arrangements take this policy into consideration	yes			
Risk assessments for educational visits are in place	yes			
Process for reporting incidents to Ealing Council Health and Safety	yes			

Appendix 2: Medical questionnaire (for the school enrolment form the checked using healthcare plan on Medical Tracker annually thereafter)

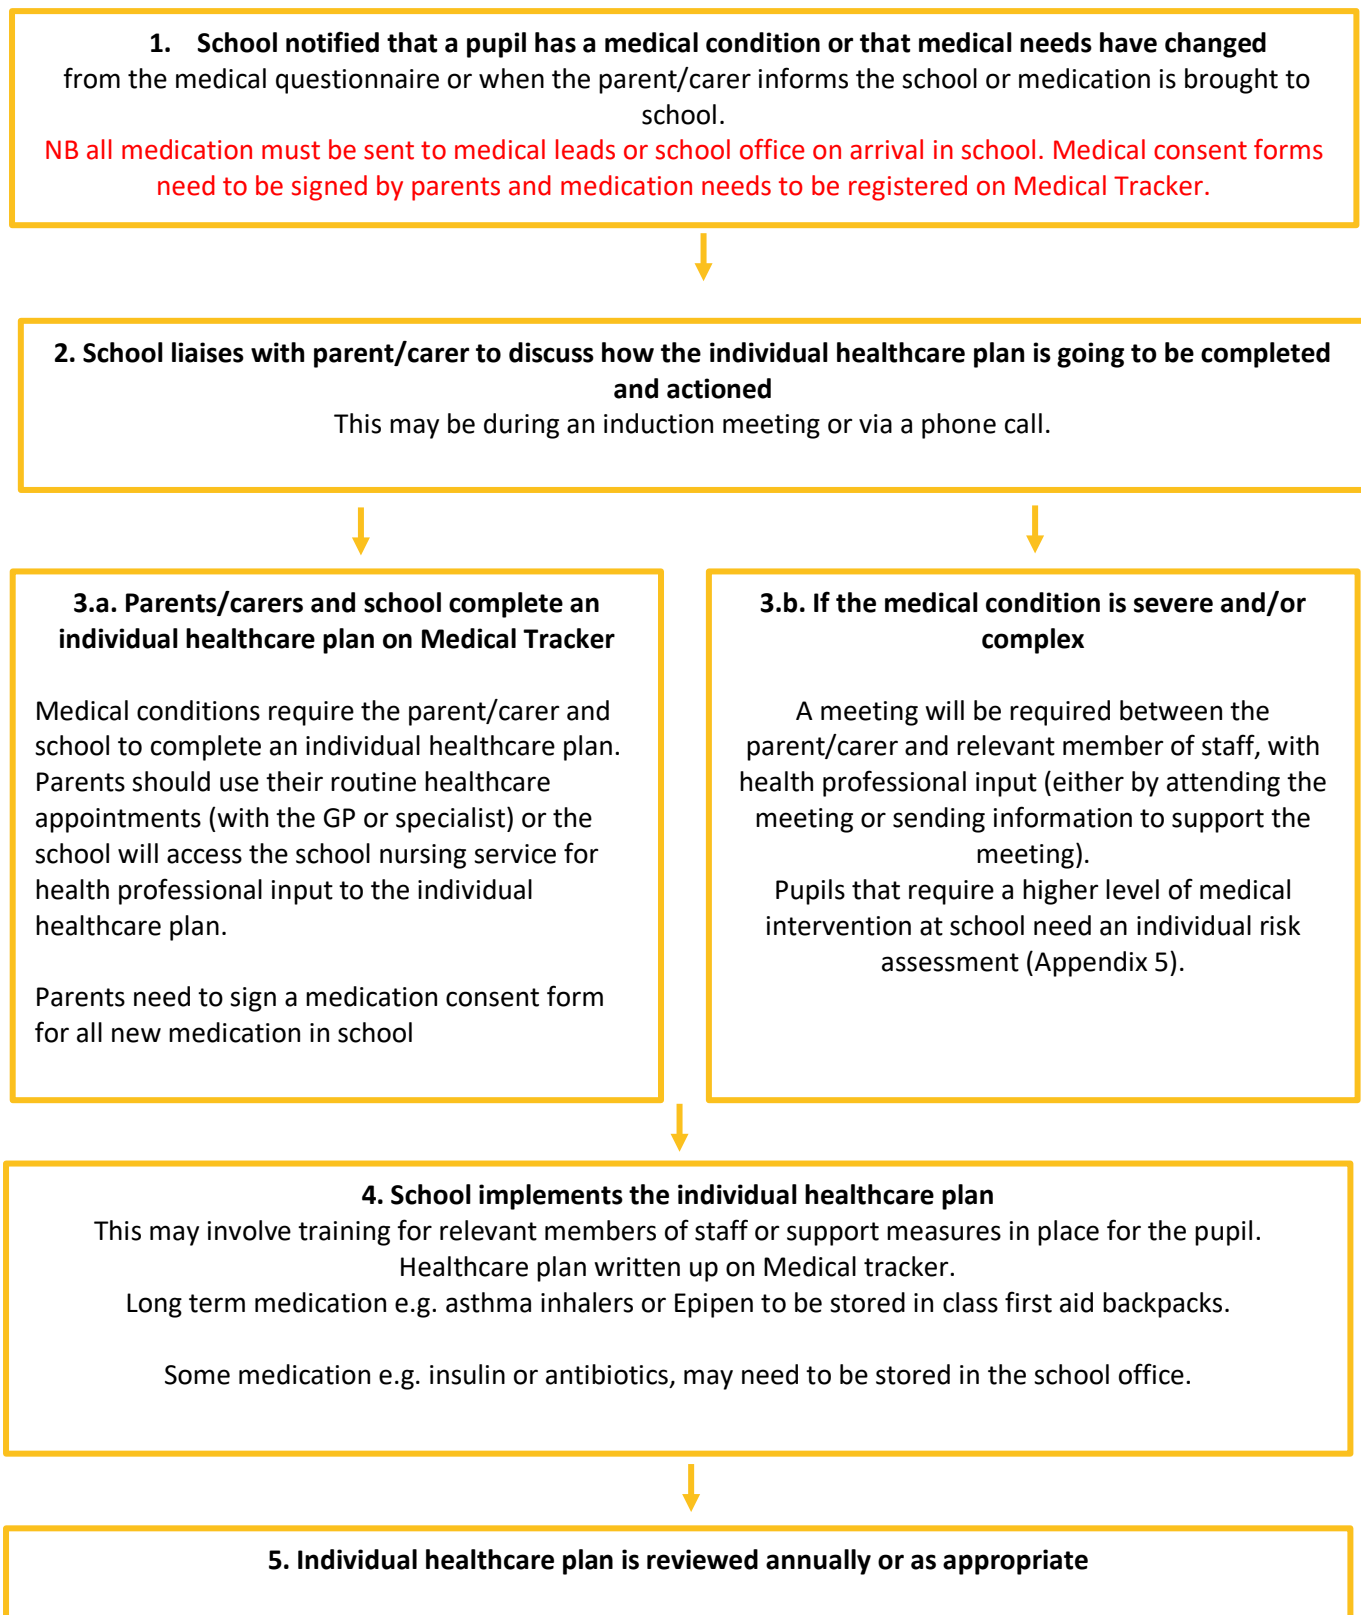

Name of Pupil	
Date of Birth	
Year Group / Class	
Name of GP	
Address of GP	
1. Is your child currently under the care of the GP/clinic/hospital for a medical condition* (physical or mental health)? Yes / No	
If yes, please give details:	
2. Is there any other condition/health concern you need to make us aware of? Yes / No	
If yes, please give details:	
3. Does your child require medication to be taken during school hours? Yes / No	
If yes, please give details:	

If you have ticked 'yes' above, a member of staff will contact you to discuss your child's medical needs further. All pupils with medical conditions* will require an individual healthcare plan before the start of the school year. If the medical condition is serious, complex and/or life threatening the school will organise a meeting to discuss the individual healthcare plan. If medication needs to be taken at school, all parents/carers will need to complete the medication form (Appendix 6 of the 'Supporting Pupils with Medical Conditions' Policy).

4. I give consent to share this information with relevant school staff and health professionals including the school nursing service. Yes / No	
Name of Parent / Carer	
Signature of Parent / Carer	
Date	

** The school takes 'medical condition' to refer to any physical or mental health condition that requires ongoing health professional input.*

Appendix 3: Procedure following notification that a pupil has a medical condition (flow chart).

Appendix 8: Emergency Inhalers and Adrenaline Auto-Injectors (AAIs)

This section needs to be read in conjunction with the following Department of Health guidance:

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/416468/emergency_inhalers_in_schools.pdf

https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/645476/Adrenaline_auto_injectors_in_schools.pdf

Schools are not required to hold an inhaler or AAIs – this is a discretionary power enabling schools to do this if they wish. However, keeping an inhaler and/or AAIs for use in an emergency prevents unnecessary and traumatic trips to hospital for a child and potentially saves their life. Schools that choose to hold an emergency inhaler and/or AAIs need protocols for their use to protect staff by ensuring they know what to do in the event of a child having an asthma or anaphylactic attack.

The protocol should include:

- Arrangements for the supply, storage, care, and disposal of the inhaler, spacers and AAI devices, in line with this ‘Supporting Pupils with Medical Conditions’ policy
- Having a register of children in the school who have been:
 - Diagnosed with asthma or prescribed a reliever inhaler. A copy of the register should be kept with the emergency inhaler
 - Prescribed AAIs (or where a doctor has provided a written plan recommending AAI(s) to be used in the event of anaphylaxis).
- Having written parental consent for use of the emergency inhaler and/or for use of the spare AAI(s), included as part of a child’s individual healthcare plan. This should be signed in the school asthma card or the allergy action plan (Appendix 4).
- Ensuring that the emergency inhaler and spare AAIs are only used by children with written parental consent for their use
- Appropriate support and training for staff is provided in the use of the emergency inhaler and spare AAIs in line with this ‘Supporting Pupils with Medical Conditions’ policy
- Keeping a record of use of the emergency inhaler and/or AAIs as required by this ‘Supporting Pupils with Medical Conditions’ policy (Appendix 7) and informing the parent/carer when their child has been administered an inhaler/AAI and whether this was the school’s spare inhaler/AAI or the pupil’s own device (Appendix 9). This should include where and when the attack took place, how much medication was given and by whom.
- Having at least two volunteers responsible for ensuring the protocol is followed

Schools can purchase small quantities of inhalers, spacers and AAIs from a community pharmacy. The pharmacy will need a request signed by the principal or head teacher on headed paper stating:

- The name of the school for which the product is required;
- The purpose for which that product is required, and
- The total quantity required

ASTHMA

From 1st October 2014 the Human Medicines (Amendment) (No. 2) Regulations 2014 allows schools to buy salbutamol inhalers, without a prescription, for use in emergencies.

The emergency salbutamol inhaler should only be used by children, for whom written parental consent for use of the emergency inhaler has been given, who have either been diagnosed with asthma and prescribed an inhaler, or who have been prescribed an inhaler as reliever medication.

An Emergency asthma inhaler kit should include:

- A salbutamol metered dose inhaler;
- At least two plastic spacers compatible with the inhaler;
- Instructions on using the inhaler and spacer;
- Instructions on cleaning and storing the inhaler;
- Manufacturer's information;
- A checklist of inhalers, identified by their batch number and expiry date, with monthly checks recorded;
- A note of the arrangements for replacing the inhaler and spacers;
- A list of children permitted to use the emergency inhaler as detailed in their individual healthcare plans;
- A record of administration (i.e. when the inhaler has been used). This should include where and when the attack took place how much medication was given and by whom.

Schools can consider keeping more than 1 kit if they cover more than 1 site.

It is recommended that at least 2 volunteers from school staff should have responsibility for ensuring that:

- On a monthly basis, the inhaler and spacers are present and in working order, and the inhaler has sufficient number of doses available;
- Replacement inhalers are obtained when expiry dates approach;
- Replacement spacers are available following use;
- The plastic inhaler housing (which holds the canister) has been cleaned, dried and returned so that replacements are available if necessary.

The kit must be kept in a safe place but must not be locked away. It should be kept separate from any children's inhalers and the inhaler(s) labelled to avoid confusion with a child's inhaler.

The plastic spacer should not be reused and can be given to the child to use at home. The inhaler can be reused provided it is cleaned after use.

A child may be prescribed an inhaler for their asthma which contains an alternative reliever medication to salbutamol (such as terbutaline). The salbutamol inhaler should still be used by these children if their own inhaler is not accessible – it will still help to relieve their asthma and could save their life.

Ealing Council Supporting Pupils with Medical Conditions Policy Levels of Training Guidance September 2018

<https://www.healthylondon.org/wp-content/uploads/2017/10/Pharmacy-guidance-for-supply-of-salbutamol-to-schools.docx>

ANAPHYLAXIS

From 1 October 2017, the Human Medicines (Amendment) Regulations 2017 allows schools to obtain adrenaline auto-injector (AAI) devices without a prescription, for emergency use in children who are at risk of anaphylaxis but their own device is not available or not working (e.g. because it is broken, or out-of-date).

Schools may administer their “spare” adrenaline auto-injector (AAI), obtained for use in emergencies, if available, but only to a pupil at risk of anaphylaxis, where both medical authorisation and written parental consent for use of the spare AAI has been provided. The school’s spare AAI can be administered to a pupil whose own prescribed AAI cannot be administered correctly without delay.

In severe cases the allergic reaction can progress within minutes into a life-threatening reaction. Severe reactions can require much more than an adrenaline injection and it is therefore vital to contact Emergency Services as early as possible.

In the event of a possible severe allergic reaction in a pupil who does not meet these criteria, emergency services (999) should be contacted and advice sought from them as to whether administration of the spare emergency AAI is appropriate.

SEVERE ANAPHYLAXIS IS AN EXTREMELY TIME-CRITICAL SITUATION: DELAYS IN ADMINISTERING ADRENALINE HAVE BEEN ASSOCIATED WITH FATAL OUTCOMES.

Depending on their level of understanding and competence, **children and particularly teenagers should carry their AAI(s) on their person at all times or they should be quickly and easily accessible at all times.** If the AAI(s) are not carried by the pupil, then they should be kept in a central place in a box marked clearly with the pupil’s name but NOT locked in a cupboard or an office where access is restricted.

AAIs are available in different doses depending on the manufacturer. Schools should hold a single brand to avoid confusion in training and administration. ‘EpiPen’ is the most well-known and likely to be the brand used by most pupils.

It is good practice for schools holding spare AAIs to store these as part of an emergency anaphylaxis kit which should include:

- 1 or more AAI(s)
- Instructions on how to use the device(s)
- Instructions on storage of the AAI device(s)
- Manufacturer’s information
- A checklist of injectors, identified by their batch number and expiry date with monthly checks recorded
- A note of the arrangements for replacing the injectors
- A list of pupils to whom the AAI can be administered
- An administration record.

The kit must be kept in a safe place but must not be locked away. It should be kept separate from any children’s AAIs and the labelled to avoid confusion. The kit should be located not more than 5 minutes away from where it might be needed.

AAIs can be used through clothes and should be injected into the upper outer thigh in line with the instructions provided by the manufacturer. If someone appears to be having a severe allergic reaction (anaphylaxis), emergency services (999) MUST be called without delay, even if they have already used their own AAI device, or a spare AAI.

- When dialling 999, give clear and precise directions to the emergency operator, including the location's postcode.
- If the pupil's condition deteriorates and a second dose adrenaline is administered after making the initial 999 call, make a second call to the emergency services to confirm that an ambulance has been dispatched.
- Send someone outside to direct the ambulance paramedics when they arrive.
- Tell the paramedics:
 - If the child is known to have an allergy
 - What might have caused this reaction e.g. recent food;
 - The time the AAI was given.

Appendix 9: Letters to inform parents/carers of their child's use of the school's emergency inhaler*

School name:.....

Child's name:.....

Child's class:.....

Date:.....

Dear.....

This letter is to formally inform you that.....has had problems breathing today.

This happened when.....

They did not have their own inhaler with them so a member of staff helped them to use the emergency asthma inhaler containing salbutamol. They were givenpuffs.

Although they soon felt better, we would strongly advise you that your child is seen by their own doctor as soon as possible.

Please provide a new unopened replacement spacer as soon as possible.

Please can you ensure that your child brings in a working in-date inhaler and spacer for use in school. Both should be clearly labelled with your child's name and date of birth.

Yours sincerely

**Please note that parents will be informed immediately when a child has used the school's emergency adrenaline autoinjector (and emergency services called).*

Appendix 10: Training resources for Ealing school staff

Online

Anaphylaxis Campaign AllergyWise Online Course

Free online anaphylaxis training course AllergyWise for Schools is designed to ensure that key staff in schools are fully aware of the signs and symptoms of anaphylaxis, how to provide emergency treatment and the implications for management of severely allergic children from Key Stages 1 to 5 in an education setting.

<https://allergywise.org.uk/course-login/>

Supporting Children's Health Asthma Online Course

Being aware of asthma and its triggers can help to ensure children with asthma in your care are safe and can get involved in the same activities as any other child without issue or harm.

This module aims to help you support children who have asthma by:

- Raising your awareness of the condition and how it's managed
- Exploring plans, you may need to ensure that children with asthma in your care are supported

<https://www.supportingchildrenshealth.org/asthma-module/>

MindEd

MindEd is a free educational resource on children and young people's mental health for all adults.

<https://www.minded.org.uk>

Face to face

School nursing service training (includes management of medical emergencies training for schools):

www.egfl.org.uk/schoolnursing

Ealing Health and Safety training (includes First Aid training for schools):

www.egfl.org.uk/HStraining

Appendix 11: First aid training guidance

First-aid can prevent deaths and can also prevent minor medical problems and injuries from escalating into major ones. Guidance exists for schools on the subject of first aid and this section of the 'Supporting Pupils at Schools with Medical Conditions' policy draws and refers to these accordingly.

First aid in schools:

The Department for Education good practice guidance titled [Guidance on First Aid for Schools](#) explains that the numbers of first aid personnel required in schools is not an exact science. A suitable and sufficient risk assessment needs to be carried out taking into account the school's specific circumstances such as: the size and location of the school, any specific hazards on-site, any specific needs and any historic accident data. Schools should consider the risks to employees, pupils and visitors as part of this risk assessment.

The Department for Education [Statutory framework for the early years foundation stage](#) sets out mandatory standards for the learning, development and care for children from birth to 5 years old. In this, it is mandated that all Schools and Ofsted registered early years providers must have at least one person who has a current paediatric first aid (PFA) certificate available at all times when children are present, and must accompany children on outings. This framework also mandates the PFA Certificate course criteria.

In addition, HSE document [L74](#) (Third edition-2013) details useful guidance on first aid matters in the workplace including: first aid courses content, suggested numbers of first aid personnel, first aid kits and training provider selection. This document is a valuable resource to help schools complete their first aid risk assessment.

Ealing Council has a page on the EGfL www.egfl.org.uk/firstaid dedicated to first aid which is also a useful resource for schools. This page includes a blank template that Schools can use to carry out their first-aid risk assessment.

Automatic External Defibrillators (AEDs) in schools:

Ealing Council purchased the Powerheart® G5 AED for schools in the Borough in 2017. This was the most appropriate unit for schools as advised by the London Ambulance Service.

The Department for Education guide for schools on [automated external defibrillators \(AEDs\)](#) provides guidance on the purchase, use, installation, training, maintenance and additional considerations (such as the development of a resuscitation plan and safety considerations) of AEDs. This guidance explains that AEDs are designed for use by people who can simply follow the step-by-step instructions provided on the AED at the time of use, without any specific training. This guidance also explains that it should be sufficient for schools to circulate the manufacturer's instructions to all staff and then to provide a short general awareness briefing session in order to meet their statutory obligations. Any awareness briefing could be incorporated into any wider training on CPR and the chain of survival.

Ealing Council has a page on the EGfL www.egfl.org.uk/AED dedicated to AEDs which is also a useful resource for Schools. This page includes a video that demonstrates the use of the Powerheart® G5 AED.

Appendix 12: Checklist: responsibilities of parents/carers

- ✓ Informing the school if your child has a 'medical condition' (as defined in the 'Supporting Pupils with Medical Conditions' policy) and providing consent to share this information with relevant healthcare professionals including the school nursing service.
- ✓ Liaising with the school to complete an individual healthcare plan, ideally before the start of the school year. The individual healthcare plan requires health professional input, either by the school nursing service (arranged by the school), or by appointment with your health professional (GP, practice nurse or specialist).
- ✓ Completing a medicines permission letter if your child requires medication during school hours.
- ✓ Completing an individual pupil risk assessment form during a meeting with school staff if your child's needs are severe, complex or potentially life threatening.
- ✓ Informing the school of any medicines the child requires during visits, field trips and other out-of-school activities.
- ✓ Ensuring your child's medicines and medical devices are labeled with their full name and date of birth, in the original pharmacy packaging.
- ✓ Ensuring that your child's medicines are within their expiry dates.
- ✓ Ensuring that new and in date medicines come into school on the first day of the new academic year, to collect all medication back at the end of the school year, and to dispose of any out-of-date medication.
- ✓ Ensuring that your child catches up with any school work they have missed if they are off school due to their medical condition or healthcare appointments.
- ✓ Providing the school with supporting information from your healthcare professional if your child has frequent or prolonged absence(s) from school.
- ✓ Informing the school of any changes to your child's condition
- ✓ Liaising with the school annually to ensure that the individual healthcare plan is up to date (even if just to say 'no changes').

Level 2 training

Trained first aiders (including those who may be administering medicines/medical procedures)
As for level 1 and also attendance every three years at the following:

- School nursing service training: management of medical emergencies training for schools
<https://www.egfl.org.uk/services-to-schools/ealing-school-nursing-service-201819>
- Ealing Health and Safety training (includes First Aid training for schools):
<https://www.egfl.org.uk/facilities/health-and-safety/health-and-safety-training>

Level 3 training

Medical conditions co-ordinators/leaders

As for level 1 and also annual attendance at the following:

- School nursing service training: management of medical emergencies training for schools and implementing the 'supporting pupils with medical conditions' policy for schools
<https://www.egfl.org.uk/services-to-schools/ealing-school-nursing-service-201819>

Attendance every three years at the following:

- Ealing Health and Safety training (includes First Aid training for schools):
<https://www.egfl.org.uk/facilities/health-and-safety/health-and-safety-training>

Additional training for pupils with more complex needs (section 11.2 of the 'Supporting pupils at school with medical conditions' policy)

Please also refer to Royal College of Nursing publication 'Meeting health needs in education and other community settings' (2018)

For pupils with severe/complex medical conditions, who require specialist health professional input, there may be a decision to delegate certain health care procedures to a member of school staff. This health professional will carry

out a risk assessment to identify if the procedure can be undertaken by the staff member or requires a registered nurse. Where the risk can be mitigated through appropriate training, the procedure may be delegated in partnership with the school/employer. The training package and competency assessment will be developed on an individual basis specific to the needs of the pupils. The decision to delegate should include the range of questions as detailed below.

- Is the procedure specified within the staff member's role and job description?
- Does the employer have appropriate policies, procedures in place to support delegation?
- Has consent been gained from those with parental/legal responsibility and/or the young person?
- Is the delegation on a named CYP basis?
- Is the delegation specified within the child's individual healthcare plan?
- Is the environment appropriate for the procedure to be carried out?

There are a number of clinical procedures which have been deemed appropriate for delegation by the Royal College of Nursing (2018), subject to the necessary training, assessment of competence and supervision of practice.

- Administering medicine in accordance with prescribed medicine, with pre-calculated dosage provided via naso-gastric tube, gastrostomy tube, orally or applied to skin, eyes and/or ears.
- Injections (intramuscular or subcutaneous). These may be single dose or multiple dose devices which are pre-assembled with pre-determined amounts of medication to be administered as documented in the individual child's care plan (preloaded devices should be marked when to be administered e.g. for diabetes where the dose might be different am or pm. In many circumstances there may be two different pens, one with short acting insulin and another for administration at night with long acting insulin).
- Inserting suppositories or pessaries with a pre-packaged dose of a pre-prescribed medicine.
- Rectal medication with a pre-packaged dose i.e. rectal diazepam.
- Rectal paraldehyde which is not pre-packaged and has to be prepared – permitted on a named child basis as agreed by the child's lead medical practitioner i.e. Paediatrician or GP.
- Administration of buccal or intra-nasal Midazolam and Hypo Stat or Gluco Gel.
- Assistance with inhalers, cartridges and nebulisers.
- Emergency treatments covered in basic first aid training including airway management.
- Tracheostomy care for a stable stoma including suction using a suction catheter.
- Emergency change of a tracheostomy tube.
- Nasal or oral suctioning which does not go beyond the back teeth and where there is an effective cough. This should be prescribed by a doctor, children's respiratory nurse specialist or a paediatric respiratory physiotherapist.
- Assistance with prescribed oxygen administration including oxygen saturation monitoring where required.
- Administration and care of liquid oxygen administration.
- Ventilation care for a child with a predictable medical condition and stable ventilation requirements (both invasive and non-invasive ventilation).
- Blood glucose monitoring and carbohydrate counting as agreed by the child's lead nursing/medical practitioner. E.g. GP, Paediatrician, Children's Diabetes Nurse Specialist.
- Bolus or continuous feeds via naso-gastric tube or gastrostomy.
- Bolus or continuous feeds using a pump via gastrostomy or jejunostomy.
- Intermittent catheterisation and catheter care.
- Supporting a child/young person to access a mitrofanoff.
- Stoma care including the requirement to maintain patency of a stoma in an emergency situation prior to seeking advice from the registered nurse.*

The following clinical procedures should **NOT** be undertaken by unregistered health and non-health qualified carers.

- Assessment of care needs, planning a programme of care or evaluating outcomes of a programme of care.
- Re-insertion of a naso-gastric tube.
- Re-insertion of percutaneous endoscopic gastrostomy tubes, balloon type gastrostomy tubes or low profile devices except as advised in an emergency.*
- Intramuscular or sub-cutaneous injections involving assembling syringe or intravenous administration.

- Programming of syringe drivers.
- Filling of oxygen cylinders.
- Laryngo Pharyngeal (Nasal or Oral) suctioning into the pharynx past the epiglottis but above the vocal cords, this should be carried out by a registered nurse due to the risk of laryngeal spasm.
- Tracheal suctioning, this is specialist suctioning through the vocal cords and should only be carried out by a specialist and is not a procedure used in community settings.
- Siting of indwelling catheters.
- Medicine not prescribed or included in the care plan.
- Ventilation care for an unstable and unpredictable child.

Appendix 15: Covid-19 restrictions

Parents should follow the following government advice when deciding on whether to allow their children to return to school. [All current advice can be found on the government website here.](#)

Children and young people who are considered [extremely clinically vulnerable and shielding](#) should continue to shield and will not be expected to attend school. They can access work on j2e or order a paper pack from the school to be collected on Mondays.

Clinically vulnerable (but not clinically extremely vulnerable) people are those considered to be at a higher risk of severe illness from coronavirus (COVID-19). A minority of children will fall into this category, and parents should follow medical advice if their child is in this category.

Children and young people who live in a household with someone who is [extremely clinically vulnerable and shielding](#) can attend school where they will be isolated from other children and adults and it will be expected that the children will be able to adhere to strict social distancing guidelines and are able to understand and follow these instructions.

Children and young people who live with someone who is clinically vulnerable (but not extremely clinically vulnerable) as defined in the [social distancing guidance](#) and including those who are pregnant, can attend at parents' discretion. Paper packs or work on j2e can be used for home learning in all circumstances.

Pupils will continue to need to have access to medication while attending school e.g. asthma inhalers will not be able to attend unless this medication is up to date and in school. Whilst the Covid-19 restrictions are in place the school will accept one asthma pump or epi-pen in school per pupil which will remain in the group medical box and kept with the children, by the adult in charge, at all times.
